

Manganese in Drinking Water

A REPORT FOR THE CITY OF CUSTER

We serve more than 2,067 customers an average of 155,025 gallons of water per day. Our water is groundwater that we produce from local wells. The average manganese concentration in our drinking water is 0.06 mg/l. This concentration is below health advisory levels established by the United States EPA and considered safe to drink.

Additional information regarding manganese in drinking water can be found at the following website:
